Last Chance Animal List

Published on November 11, 2026

Please see below for this week's Last Chance Animals list. As a reminder, all official requests need to be submitted by 6 a.m. next Wednesday. Below are the descriptions of the animals included on the LCA list. All the animals' observation and medical notes have also been included in an attachment for your convenience.

ALL inquiries and requests regarding animals on the LCA list MUST be communicated to Animal Services through the Rescue.Coordinator@ocfl.net email address within the timeframe indicated. Failure to do so may result in a delay and failure of your message to reach the appropriate individuals at Animal Services.

Communication must be from the rescue's registered contacts.

Animal Services will not liaise with unauthorized personnel on behalf of the rescue.

Please understand we will not be able to offer extensions for any of these pets and the deadline to receive placement is firm.

To help offset the cost of care, Orange County Animal Services is offering rescue partners a $250 incentive per dog for accepting any of the dogs listed below.

The shelter is still experiencing construction activities related to the development of the new animal shelter. Please note these activities do not impact our pet placement processes, and adoptions, rescue pulls and reclaims will continue as usual.

A536771 Rocco –

- Originally impounded 11/9/23
    - Stray, while loose attacked another dog, broke that dog's back (victim dog recovered) and reportedly was aggressive toward cats as well
    - Reclaimed by owner
- Current impound 11/2/26
    - Stray, attempts to contact former owner have been unsuccessful
- HW(-)
- Available for rescue placement only
- Rocco is very friendly with people and showed no aggression toward similarly sized dogs during his behavioral assessment
    - However, he displayed a strong prey drive when a smaller dog ran nearby.
    - To minimize potential risks, Rocco should be placed as the only pet in a home with an experienced handler who can maintain control and safely manage his interactions around other animals, particularly smaller ones.
- Additional medical and observation notes are attached

A590085 Taylor –

- Impounded 10/26/26

    - Surrendered as owner reports dog barked too much and owner developed medical problems that limited their ability to care for the dog
    - Taylor was purchased from a breeder as a puppy and known this one household her whole life
- HW(-)
- Available for rescue placement only
- Taylor has been friendly with certain individuals but has also exhibited concerning behaviors, including lunging, baring her teeth and snapping at staff
- Taylor appears overwhelmed by the shelter environment and is unlikely to thrive here
- Additional medical and observation notes are attached

A592232 Milo –

- Originally impounded 3/19/26
    - Stray
    - Adopted 3/28/26
- Current impound 10/24/26
    - Surrendered following a bite to a child in the home, child was reportedly playing with the dog when the bite occurred, listed as Level 3 bite on the Dunbar Bite Scale
- HW(-)
- Available for rescue placement only
- Milo has exhibited some reactivity in the kennel environment, including attempts to snap at staff
    - Due to these concerns, placement in a home with young children is not recommended
- Additional medical and observation notes are attached

Last Chance Animals

Behavior Observation Report

11/4/2026

Name and ID: Rocco (A536771)

Observed By: SLP
Eval Type: ABC
Eval Location:

Recommendations:
STAFF ASSISTANCE ONLY SINGLE DOG ONLY

ABC 175 and 180 pulled A536771 for assessment. A536771 allowed leashing easily and walked decently on leash. In the yard, A536771 focused on marking and defecating first and then sought social. A536771 allowed full handling and leaned into handlers for attention. A536771 was very pushy with treats and took them roughly, so handlers worked on commands with him. A536771 knows sit and paw. 180 then brought out a neutered male, A608285. A536771 greeted the other dog with tall body language at the fence, but did not show any reactivity. 180 entered with the other dog. Both dogs sniffed one another respectfully. A536771 was a bit conflicted, but began pawing at the other dogs face in a playful but insecure manner and sat down. No outward aggression noted. 180 then walked a small dog by to test for prey drive. A536771 was not reactive at first, but when the small dog began running, A536771 began chasing with vocalization.
Recommendation: Due to prior incident of causing injury to another dog, do not recommend pairing. A536771 may have a chase/prey drive and would do best as the only pet.

11/3/2026 **Name and ID: Rocco (A536771)**

Observed By: DME
Eval Type: INTAKE
Eval Location: SHELTER

Intake: SEEK SOCIAL

Easily handled and walked but liked to jump, during intakes thrashed very hard when he felt contact from the needle
making staff due to size possible animal aggression from previous impound

---

Observed By: DME
Eval Type: INTERACTION
Eval Location: SHELTER

Recommendations:
STAFF ASSISTANCE ONLY

While working on A608604, A536771 started to whine and jump around on in the kennel. tested reactivity on leash and A536771 pulled towards A608604 while jumping, ASO SF tried to break A536771s focus by clapping and it didnt work. calmed down after A608604 left line of sight.

Observed By: CJF
Eval Type: INTERACTION
Eval Location: SHELTER

Result: UNABLE TO PAIR

Interaction: LUNGES / SNAPS

Attempted pairing A536771 with A607498. Walking down general A536771 was jumping and barking towards other kennels. A536771 was snarling at the front of kennel. A607498 was loose body and social. Upon entering kennel A536771 immediately went to bite A607498 in the face. Ended pair, placed in ISO

11/10/2023 **Name and ID: Rocco (A536771)**

Behavior Observation Report

11/4/2026 **Name and ID: Taylor (A590085)**

Observed By: SLP
Eval Type: ABC
Eval Location:

Recommendations:
RESCUE ONLY

ABC 175 and 180 pulled A590085 for re-assessment. A590085 was very barrier reactive in the kennel, lunging, showing teeth, and snapping. 175 leashed A590085 easily and she calmed down. In yard, A590085 allowed handling from 175 without issue, but was highly reactive towards other dogs that were outside (pulling hard and vocalizing). 180 attempted to say hello and A590085 charged up, showed teeth, and went after her hand. This happened twice. A590085 did not actively pursue 180 when she was sitting and not interacting, but if she attempted to interact, A590085 got combative.
Recommendation: Keep as Rescue Only. A590085 appears to only like one handler and will bite if others attempt to handle.

11/3/2026 **Name and ID: Taylor (A590085)**

Observed By: SLP
Eval Type: ABC
Eval Location:

Recommendations:
RESCUE ONLY

ABC 175 and 181 pulled A590085 for assessment. A590085 allowed leashing easily and walked nicely to the yard. In the yard, A590085 focused on urinating and defecating first. A590085 then sought social. A590085 hopped in 175's lap and allowed petting and licked 175's hands/arms. A590085 then jumped in 181's lap. A590085 allowed petting and handling for about 30 seconds and then suddenly shifted. A590085 began growling, snarling, and lunging at 181's legs. 175 grabbed leash and got A590085 away from 181. A590085 continued to pursue 181 and charge up. After a minute, A590085 calmed down. A590085 jumped in 175's lap again and was loose again. A590085 went over to 181 again to seek social, jumped in her lap, and nudged her hand. 181 began petting A590085 and A590085 allowed it, but shifted again and lunged and bit at 181's hand (did not break skin). 175 pulled her away. 174 was walking by so 175 asked if he'd come in to see how A590085 would do with another person. 174 sat on the bench and A590085 jumped in his lap. A590085 allowed petting from 174, but then stiffened, snarled, and lunged forward at him. 175 held A590085 away. 174 went to leave the yard and A590085 began charging up at him again. 174 lifted foot up to block A590085, A590085 bit onto his shoe. 175 pulled A590085 away again. A590085 calmed down. Handlers then dog tested A590085 (which was what the initial assessment was for). Upon seeing the other dog, A590085 charged up at the fence, snarling, and attempting to bite. 181 entered the yard to see if the reaction lessened without a barrier. A590085 continued charging up with hyperfixation, piloerection, and hard stare. A590085 was so overstimulated that she began to cut off her airway; handlers halted assessment. 175 opted to place A590085 into ISO due to severe mental/behavioral decline. Discuss in pathways; Rescue Only.

10/31/2026 **Name and ID: Taylor (A590085)**

Observed By: SLP
Eval Type: ABC
Eval Location:

Recommendations:
STAFF ASSISTANCE ONLY

In kennel, A590085 showed reactivity and frustration (extensive vocalization, jumping, lunging). A590085 allowed leashing easily and calmed down once out of the kennel. In yard, A590085 focused on relieving herself and then sought social with handler. A590085 jumped into handlers' lap for attention. A590085 allowed full handling without issue. A590085 did show barrier/fence reactivity towards other dogs passing by (rushing up with piloerection and excessive vocalization). 175 stepped on leash and lured A590085 away. A590085 then calmed down again.
Recommendation: Remain on Staff Assist. Pairing attempts should be done in the yard due to potential reactivity issues from A590085. Boost to rescue as A590085 may not do well long term here.

10/29/2026 **Name and ID: Taylor (A590085)**

Observed By: JLY

Physical Exam:

A scar was located on the abdomen of your animal. It appears to be a spay scar. In the unlikely event she comes into heat please contact Orange County Animal Services immediately and, pending a veterinary exam, we will spay her at no charge.

We recommend that you take your new pet DIRECTLY to your veterinarian with this form for examination and any necessary treatment. As a precautionary health measure, we also recommend that you keep your new pet away from any other pets for 10 days.

*For a free first exam, please see your VCA Healthy Start Certificate for details about their program for recently adopted shelter pets.

Behavior Observation Report

11/5/2026 **Name and ID: Milo (A592232)**

Observed By: SLP
Eval Type: ABC
Eval Location:

Recommendations:
RESCUE ONLY

ABC 175 and 181 pulled A592232 for re-assessment. A592232 was loose/wiggly in kennel and presented much better than previously; no aggression noted. A592232 allowed leashing easily. In yard, A592232 sought social with both handlers and allowed full handling. A592232 jumped on bench with handlers and allowed petting. A volunteer had a female dog, A596833 in the neighboring yard and both dogs greeted one another playfully at the fence (major improvement on A592232's part!). Handlers opted to introduce them. 181 grabbed the female dog, A608111. A592232 was very intrusive with greeting and rushed in while air nipping. Once contact was made, A592232 did not follow through with biting and instead initiated play. A592232 was very awkward and insecure with play, as it took a few minutes for him to fully loosen up. Handlers dropped leashes and both dogs played rough/rowdy for about 10 minutes without issue. A608111 became very rough and bit A592232 a bit harder, which caused A592232 to overcorrect. A592232 went after A608111 and handlers yelled to separate them. Dogs separated, shook it off, and went back to being neutral with one another.
Recommendation: Boost to rescue due to intermittent kennel presentation issues; may not be able to be paired due to tendency to over-correct. A592232 is not dog aggressive, but can be inappropriate with greeting.

11/3/2026 **Name and ID: Milo (A592232)**

Observed By: SLP
Eval Type: ABC
Eval Location:

Recommendations:
STAFF ASSISTANCE ONLY

ABC 175 and 181 pulled A592232 for assessment. A592232 was loose/wiggly at first in the kennel, but when handlers went to say hello, A592232 shifted, stiffened, growled, and snapped. A592232 then retreated to the back with piloerection throughout back and continued growling. Handlers went to the back of the kennel where A592232 allowed leashing but remained leery. A592232 walked nicely once out of the kennel. In the yard, A592232 went back to being loose/wiggly and sought social with both handlers. A592232 allowed full handling in yard. Handlers resource guard tested A592232. A592232 ate the food and didn't show growling or attempts to bite when the hand approached. A592232 was loose/wiggly when other staff approached the yard as well. 181 then brought out a social spayed female dog. A592232 was very reactive upon seeing A592232 and charged up at the fence, muzzle punching with vocalization. 175 pulled A592232 away. 181 entered the yard with the other dog who was loose/wiggly and play bowing. A592232 continued trying to rush in. 175 went slow and eventually allowed A592232 to get closer. A592232 snarled and snapped at the other dogs' face. Opted to place A592232 back into ISO.
Recommendation: Reassess one more time; if still reactive in kennel and reactive to other dogs, recommend No Candidate.
